

# ARDI

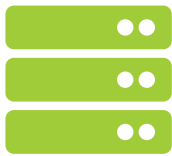

## ASSET RELATIONSHIP & DATA INTEGRATOR

### WHAT IS ARDI?

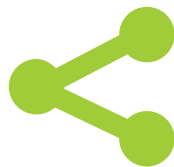

**ARDI is more than a data sourcing program — it is a means of interpreting and analysing data in a way that suits you.**

With an innovative approach to visualising your data, ARDI consolidates, distributes, and enhances the information about your assets, delivering greater asset understandings and improving operations.

#### CONSOLIDATE YOUR DATA

No longer is your data scattered and hard to find. ARDI brings your asset information into a sole source.

#### DISTRIBUTE DATA EFFECTIVELY

Critical data is clearly displayed on a dashboard which is easily accessible where and when you need it most.

#### MAKING DATA UNDERSTANDABLE

Visualise your assets, equipment and plant using augmented and virtual reality, making it easier for you to understand your data.

## BE EMPOWERED THROUGH GREATER UNDERSTANDINGS

#### RESPONSIVE WEB

Access to concise and easy to interpret data immediately with almost any device using the web.

#### AUGMENTED REALITY

By simply scanning AR markers, your staff has vital asset information when and where they need it.

#### VIRTUAL REALITY & 3D

View any part of your site, at any time from any angle and from a safe distance!

## ARDI CLIENTS

Key to ARDI is its online web platform and group of innovative visualisation Applications – ARDI Clients – which provides solutions targeted at specific areas of your businesses.

All applications supply a unique means of accessing and visually interpreting your data, making it easier to understand and stay informed.

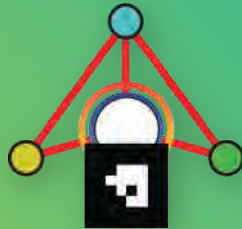

### WEB PORTAL DASHBOARD

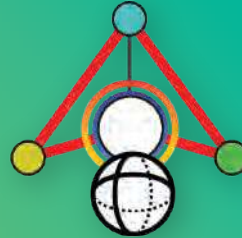

- » All levels of organisation
- » Access quickly & easily
- » User-friendly dashboard

### ARDI-VE VIRTUAL ENVIRONMENTS

- » Replicate your plant in 3D!
- » Compare, test & simulate
- » Live & historical data
- » View any angle & scale
- » Mining & heavy industry

## ARDI BENEFITS

ARDI shapes the way you use your data, not only making it easier to access, but also supplying greater insights and the opportunity to optimise performance.

While each feature of ARDI provides its own specific benefits, overall ARDI benefits include:

### INTEGRATION

ARDI consolidates your asset information from various sources and systems into one, easy-to-access point.

### INFORMATION

Critical information is delivered in a simple and concise way which empower staff to make informed and safer decisions.

### INNOVATION

Advanced technology is used to deliver the information you need now, in an innovative and effective way.

### INDEPENDENCE

Ensure staff are informed with information quickly which allows them to perform their roles faster without further training.

### INSIGHT

Gain deeper understandings of your operations by having complete control of assets and processes in real-time.

### INSPIRATION

With simple access, other software packages can use and contribute to ARDI creating customised solutions – possibilities are endless!
