BENEFITS OF AIMS SERVICES

REDUCE COSTS

AIMS saves time on tasks reducing your costs. Through AIMS our staff receive work orders, has access to relevant information such as procedures, can locate assets and confirms completion tasks all on a smart device.

REDUCE DOWNTIME

AIMS includes added diagnostic features which result in reduced plant downtime if unwanted events such as breakdowns occur. More information exactly when our team needs it means better decisions and faster diagnoses.

REMOVE UNCERTAINTY

AIMS removes uncertainty and offers high independence to our staff, taking the guess work out and saving you time. With live data, our team can include actual values into checklists and confirm faults are fixed quickly and with autonomy.

PROVE COMPLIANCE

Be assured your site is operating in compliance with company and legislative standards. You receive proof of completion along with separate notification of any issues. This includes calibration, operational, noncompliance or visual concerns.

LOWER OPERATIONAL RISKS

Reduce human error risks and lower overall operational risks, as AIMS allows our staff to correctly identify assets electronically, with access to current information needed for the effective and quick completion of maintenance tasks.

GAIN GREATER CONTROL

AIMS provides our team with the comprehensive information needed to ensure effective maintenance. With access to all information you can concentrate on management, making informed decisions and gaining greater operational control.
