Gain Crystal Clear Insights with Industrial Monitors

Unanderra, NSW - The ever-growing market of IIOT and Industry 4.0 has seen the increase demand for more visually accessible data to aid efficient process management and decision making. As resellers for quality brands, Triple i has access to the latest industrial-grade monitors which are durable, crystal clear and an effective economic choice for a wide range of applications.

Our sourced industrial monitors integrate the latest LCD and touchscreen technology to facilitate data visualisation and increase productivity. They are designed for intuitive operation in industrial environments, including smart factory and machine automation display applications. Manufactured with flexibility in mind, our portfolio of industrial monitors is available for various uses:

- **General Purpose Standard Monitors** – These monitors are available in a range of sizes from 6.5” to 24”, featuring Projective Capacitive (CPAP) or resistive touch control to support a wide range of industries. All Standard Monitors have USB and RS232 touch screen inputs, DVI and VGA video inputs, and an On-Screen Display (OSD) that enables image rotation, colour pallet changes, and push button auto reset.
- **Rugged and Performance Monitors** – Sturdy industrial monitors, rugged or performance monitors endure extreme environmental conditions. Rated to Class 1, Div. 2 hazardous locations, they are built to withstand operation in industrial environments, extreme temperatures, shock, and exposure to corrosive substances.
- **Industrial and Semi-Industrial** – Suitable in multiple applications, the industrial and semi-industrial grade monitors provide vivid images and intuitive multi-touch functionalities that can even be operated with gloves. They have a modern and sleek look with various design finishes and designs to suit your applications.
- **Featured and Data-Focused** – This range provides added features, including specific input and output ports, depending on your application. With the provision of easy-access front-facing and rear-facing ports, this range enables convenient data collection and peripheral integration.
- **Industry or Domain-Focused** - The domain-focused monitors feature industry-specific design features, such as stainless steel for food & beverage and pharmaceutical applications. They are design specifically to protect against water and dust intrusion for hygiene- demanding and hazardous environments.

These monitors offer consumer-grade usability with industrial level durability. Meaning, they offer the same ease of use found in smartphones and other touch devices, while also performing well under harsh industrial environments. Multi-touch, projective, capacitive screens enable users to make quicker and more effective decisions with a high-performance platform at a more affordable cost.
