

PRESS RELEASE  
31<sup>st</sup> OCTOBER 2022

## Completing an Electrical Apprenticeship with Triple i – Meet Andy!

Andy, an Electrical Apprentice has just finished his qualification with HVTC and Triple i to become a qualified Electrician. We caught up with him to see how he feels about reaching the end of his four-year apprenticeship and successfully completing a Certificate III: Electrotechnology Electrician Course.

### **WHAT MADE YOU DECIDE TO DO AN APPRENTICESHIP?**

*I saw it as a great opportunity to get started in a challenging career with plenty of room to grow and the chance to progress in the future. Electrical, specifically the industrial electrical industry, seemed like the perfect fit.*

### **WHAT WAS A TYPICAL DAY OR JOB LIKE?**

*I was lucky to experience a lot of variety over my apprenticeship, so most days were different. From smaller jobs involving basic electrical tasks like lighting and maintenance to large scale industrial projects incorporating design, fabrication and installation of process control, power distribution, communications, and instrumentation.*

### **WHAT WERE THE BENEFITS OF YOUR APPRENTICESHIP?**

*The major benefit of my apprenticeship was being able to learn a wide range of skills and gain knowledge from a very experienced group of tradesmen who were happy to pass on their skills and knowledge.*

### **HOW HAS THE SUPPORT BEEN FROM TRIPLE I AND HVTC?**

*Throughout the apprenticeship Triple i were great, making sure I was learning what I needed to and getting to experience a wide range of work and environments. HVTC were good, particularly in the last 12 months, making sure I had everything organised and was prepared for my Capstone Test to obtain my Electricians License and set up for success.*

### **WHAT ADVICE WOULD YOU GIVE A NEW APPRENTICE?**

*My advice would be to get involved and ask plenty of questions. Most people are happy to share their knowledge if you show interest.*

Andy began his Apprenticeship as a mature age apprentice in his early 30s, showing that it's never too late to upskill, change careers and pursue a trade. With nine current adult apprentices on board, At Triple i we proudly support mature age apprentices. Regardless of the stage of career or skills, if you have right attitude and willingness to learn we want you on our team.

Electricians at Triple i select, install, set-up, test, fault find, repair, and maintain electrical systems and equipment in building and premises, and may work in a specialised area. Apart from theory training where apprentices complete their units of competency, the on-the-job component as hosted by Triple i provides practical experience, skills, and knowledge, which set careers up for success.

We are always looking for new talent like Andy. If you would like to gain a nationally recognised qualification while obtaining valuable on the job experience, contact us today! Email your resume to [recruitment@iii.net.au](mailto:recruitment@iii.net.au).
