

PRESS RELEASE  
8<sup>TH</sup> NOVEMBER 2022

## Congratulations to our 2022 Engineering Graduates!

**Unanderra, NSW - Congratulations to Josh Garcia and Aidan Wynn, who recently completed their university degrees, with the support of Triple i. We are extremely excited about each of their achievements and their contributions as young engineers to our Engineering and Technology team.**

Both Josh and Aidan completed their undergraduate degrees at Wollongong University working with Triple i as they studied. They have become integral members of our Engineering and Technology team, gaining full-time roles officially now that they have graduated.

Josh completed a Bachelor of Mechatronics Engineering (Honours), while Aidan completed a double degree including a Bachelor of Electrical Engineering (Honours) and a Bachelor of Computer Science with Distinction. They were able to take advantage of firsthand experience as they studied, giving them the opportunity to put theory into practice with on-the-job scenarios.

**Josh Garcia, Graduate Mechatronics Engineer,** commented “Working at Triple i promotes personal & collaborative development in its employees’ skills. I am thankful for the opportunity to put my studies to real world use within this work environment & plan to continue developing my engineering skills with Triple i in the future”.

**Aidan Wynn, Graduate Data/Electrical Engineer,** commented “Working at Triple I as a Cadet during my last year of study allowed me to gain valuable insights into the real-world problems that Engineers face today. Continuing with Triple I into the future places me in a great position to learn and develop my skills in both Engineering and Computer Science”.

Engineering and Technology manager, Jason Gundlach, recognises the graduates, “Congratulations Josh and Aidan on completing your degrees and achieving Honours. The skills acquired through their studies allow us at Triple i to continue to deliver on our promise to our clients by providing effective control, automation, and data integration solutions. With Josh and Aidan as full-time team members of our Engineering & Technology team, our future looks bright”.

The Engineering Graduate Program at Triple i started due to a need for skilled engineers to help deliver outcomes for our process control, automation, and data clients. Fresh talent brings fresh ideas and ensures we are continually innovating and finding better ways to meet client’s needs. With innovation, integration and insight being at the core of Triple i, this program has proved to be a sustainable strategy and a pipeline of talent that continues to exceed expectations for our clients.

As part of the program, our undergraduates are supported by mentors within their department and at various levels of management. Combined with the exposure to the greater Triple i network of engineers, professionals, technicians, project managers and more, they are equipped with the necessary resources and encouragement to begin a successful career in their exciting fields.

For now, we look forward to continuing our support for our graduates and other trainees as they embark on their new careers with Triple i. Congratulations Josh and Aidan!
