

SOLUTION SPOTLIGHT

MECHANICAL CONSTRUCTION SHUTDOWNS

Shutdowns are vital and ensure your equipment is working effectively, not only now but for the long term. With a comprehensive shutdown strategy, our team ensures that your shutdown is conducted on time and budget. Therefore, restoring production with minimal impact.

We provide complete customised solutions based on your needs. Our shutdown services range from specific reviews and planning to shutdown support. We take the stress out of shutdowns by coordinating all resources, labour, materials, and equipment needed to execute the project.

Our shutdown management teams are assigned based on your project scope, from simple assets to complex turnarounds. We have consultants who can join your in-house operations and specialised teams who can complete the shutdown project for you.

We focus on thorough preparation and teamwork across company disciplines to plan effective and attainable project schedules. Our experts plan, manage and execute shutdowns quickly and precisely without compromising safety or quality. Our process is systematic and, as such, includes the following steps:

- Define the method and approach
- Detail activity work plans for each milestone or task
- Create plans for the main elements of the project, including:
 - Resources
 - Logistics and material handling
 - Risk management
 - Safety
 - Quality management
 - Communications
- Outline shutdown scoping and work breakdown structure
- Develop a detailed shutdown schedule

Whether you are looking for analysis and benchmarking, methodology and scoping support, or complete shutdown execution, we are your ideal solutions partner.

For more information on our shutdown services or to book a consultation, contact us today!
