Jackson Joins Engineering for Technical Support

Jackson Williams, one of our Electrical Apprentices, has joined our Engineering and Technology team to receive mentorship and gain training in technical support. Due to the increasing demand for our Engineering and Technology team, and in particular growth of our technology services, the department is strengthening and broadening its resource pool.

As part of his role Jackson will help develop solutions for new and existing equipment and processes whilst supporting the Engineering team. His past experience in mechanical project management along with his technical knowledge when combined with in-house expertise will allow him to further develop technical electrical engineering skills and proficiencies.

Jackson is a 2nd-year apprentice completing a Certificate III in Electrotechnology Electrician. This qualification provides individuals with the skills and knowledge to select, install, set up, test, fault find, repair, and maintain electrical systems and equipment.

The Engineering and Technology team are excited for what's to come and looking at more ways to better meet the needs of our valued clients.
