Welcome 2023 Electrical & Mechanical Apprentices

Triple i recently welcomed four new apprentices for 2023 who joined our workforce of now eighty across our two locations in Unanderra.

Shane Donovan, Adam Ned, Blake Mulley, and Bailey Taylor joined Triple i last month as part of our Electrical and Mechanical Apprenticeship Programs. Partnering with workforce solutions provider HVTC, our apprentices are properly trained and mentored into their desired career paths.

The Electrical and Mechanical Apprenticeships cover a wide range of common and job-specific skill sets that can be transferred across manufacturing, engineering, and electrical industry sectors. Not only are our apprentices provided with the qualification and trade skills required to begin a trade career, but they are given valuable hands-on experience.

We are pleased to continue our commitment to training the tradespeople of the future and supporting our community with meaningful employment opportunities. As such, we are proud to welcome the next generation of passionate and talented workers and are confident they will help drive the company's continued success.

To best support the company's growth plans and the broader process automation and control industry, we identified and targeted specific skill sets that we anticipate will be in high demand in the coming years. Engaging individuals who are keen to learn and apply their skills across our operations will ensure business sustainability.

We are looking forward to an exciting time together and wish everyone a good start to their professional life. Welcome, Shane, Adam, Black, and Bailey!
