

SOLUTION SPOTLIGHT

SALES

PNEUMATICS / AIR EQUIPMENT

Clean air and high-quality instrumentation are vital for optimal pneumatics. As such, our dedicated sales team delivers solutions that ensure your pneumatic plant and equipment are operating at their fullest potential.

Products and Solutions

In short, we offer products and solutions based on your specific needs. Our team delivers standardised products or customised solutions that suit your application and budget. We aim to give you an advantage by enhancing pneumatic systems productivity, ergonomics, and energy efficiencies.

We have access to a wide range of pneumatic products and automation solutions, including:

- Cylinders and drives
- Valves and valve systems
- Air preparation components
- Process valves and air actuators
- Joystick operators
- Marine throttle and gear control systems
- Micro control CAN Bus connected systems
- Valve and sensor connectors

Expertise

Our sales team has experience across different sectors. Their understandings of the technical challenges help them to develop pioneering solutions that satisfy needs and expectations.

Whether an upgrade or starting a new project, we support our clients with the resources needed to build and maintain their pneumatic network. With complete system integration and automation, our services include design, detailed engineering, air audits, supply, installation, and commissioning. Our expertise includes greenfield and brownfield projects.

Technical Support

Our team is ready to support our clients with technical support and advice during their projects. We ensure our clients get the most out of their pneumatic systems and air equipment. With a network of supplier partners, we have access to the latest technologies, quality products, and additional technical support.

We have pneumatic products and equipment that ensure you have an advantage. Contact our Sales team today to discuss your needs and how we can help!
