

SOLUTION SPOTLIGHT

MECHANICAL CONSTRUCTION SKID ASSEMBLIES

Our Mechanical Construction team can design, construct, and deliver pre-assembled equipment, taking the stress out of upgrading or installing new plant equipment, saving you time and money. We have the skill and experience to fabricate custom modular skids or supply off the shelf solutions to meet your specific needs and process requirements.

Modular or pre-assembled skids are units designed to accommodate an entire process unit in a single base frame or skid assembly. These can come in singular or several pieces that will be connected as one unit. Our skid assemblies can be simple designs such as a pump cart or a more complicated control panel system.

Our skid assemblies are completely built, meaning they are delivered to the site fully contained, tested and ready for operation. They are an effective way to reduce risk associated with construction and implementation of equipment guaranteeing a higher standard of quality, ensuring product functionality, keeping projects on schedule, improving safety, and reducing costs.

Our services are all-inclusive and beneficial to whatever lifecycle your plant and equipment are at. From design, engineering, and instrument specification, to fabrication, assembly, and delivery, we have the solutions to make sure you are up and running in no time.

At Triple i, we offer a vast range of skid-packaged equipment assemblies for all kinds of projects. Skid assemblies include, but are not limited to:

- Control panels & instrumentation
- High-pressure systems
- Pump and blower skid packages
- Heat exchanger skids
- Truck unloading skids
- Railcar unloading skids
- Ammonia transfer, ammonia injection & ammonia vaporiser skids
- Power generation natural gas combined cycle process skids
- Corrosion inhibitor skids
- Compressor skids
- Raw water pump station skids
- Water treatment skids
- Chemical process skids

Whether space or access is an issue or time, we can ensure your equipment is assembled perfectly before delivery and installation. To get started on your project, contact the team today! Visit our website www.triplei.com.au/mechanical-construction/, or call us today on 1300 422 444.
